Advanced skin treatments delivering optimum
cosmecuetical results to your skin available only
from your professional skin care therapist.

**TAKE 3 STEPS
ON YOUR PATHWAY
TO
GREAT SKIN
IN JUST 21 DAYS**

Introduction

The founder of Daniello Skin Care “The Doctors Exclusive Collection” was the renowned skin specialist, Dr Nicolas J Daniello a Board Certified Facial Plastic surgeon. During thousands of hours of facial surgery the Doctor noticed that patients internal activity (stress, happiness, sadness or poor nutrition) would show on the skin, this along with his own history of skin problems prompted his research into active skin care.

He developed truly effective formulations that would change skin performance in three easy steps. Over a 5 year period before he launched his products he treated thousands of his own patients who saw superior results.

“Profound Skin Care” is the changing brand name of Daniello Skin Care, the original unique formulations are continuously improved with cutting edge anti-oxidants, vitamins, and anti-inflammatory ingredients.

“You have the potential to change the way you look and feel about your skin”

Nicolas Daniello M. D.

The Treatment Options - ask your skin care professional for details

Face: Skin Consultation; a detailed analysis of your skin to help you decide which treatment and home care will give you lasting results.

Glycolic Peel: Suitable for men & women, this cell renewal treatment will clarify, brighten, plump and leave your skin refreshed & youthful.

The Doctors Prescription Facial: A total active remodelling facial with specific anti-oxidant and clarifying ingredients for your skin type. Tissue fluid manipulation, T.F.M. profoundly affects the skin for a difference you will see and feel.

Back Treatment: Suitable for men, women and teens to deep cleanse and clarify skin texture and reduce scarring, breakouts or blemishes.

Kojic Treatment: The results of this super boost of vitamins has to be seen. Deep repair of sundamage reduces hyperpigmentation and the skin is refreshed and plumped with hydration.

Microdermabrasion: Multi-edged magnesium oxide crystal skin re-surfacing suitable for men and women to improve the texture of the skin.

Anti-Redness Treatment: A vitamin rich treatment to reduce redness and strengthen the skin.

Ultimate Eye Treatment: For men and women to address all the signs of aging, lines, eye bags and dark circles. Helps to stimulate growth of eye lashes.

Hands & Feet: The Doctors Collection manicure and pedicure for fresher, younger and smoother hands and feet.

Body: Full body glycolic peel for overall skin rejuvenation

Bruise Relief: A treatment for post surgery or injury to reduce bruise healing time. Suitable for face or body.

Glycolic Treatments and Peels, Microdermabrasion, Anti-Redness and the Doctors Prescription Facial

Glycolic is the most superior alpha hydroxy in the world, its tiny molecular size allows maximum penetration in to the skin and therefore is capable of treating any number of skin types and conditions. The primary action of glycolic is to repair and renew damage and return skin texture to its former state. Dr. Daniello's formula of glycolic is unique and provides results like no other skin care. With over 10 years experience in Ireland the Profound Daniello products have risen to cult status.

Daniello Microdermabrasion is unique, a manual application of "safe" non-toxic, magnesium (unlike aluminium) oxide crystals. The treatment leaves the skin renewed and clarified with oxygen filled fresh cells.

High colour, skin redness, and conditions such as rosacea require a specific treatment approach that reduces skin flushing, irritation and congestion. Daniello offers a non-invasive solution for this prevalent skin condition.

The Doctor's Prescription Facial is an active visible results clarifying facial which includes the Profound trademarked T.F.M. *Tissue Fluid Manipulation Massage* plus pressure point facial lifting.

1st Step: Cleansing

Advanced Performance Glycolic Cleanser: suitable for all skins that require a deep clean, refining of pores, lines, and congestion. Apply a pea size with water to face and neck, massage in and rinse thoroughly, pay particular attention to problem areas. This unique facial wash is a cleanser, toner, and eye makeup remover in one.

Gentle Cleanser: pure clear facial wash with ingredients to reduce redness and irritation, removes debris and leaves skin clear, refreshed and softened. Use as above.

2nd Step: Active Complex

Active Glycolic Complexes: should be applied to the skin for four hours on the first day, this helps to gently introduce this active ingredient to your skin.

Active Glycolic Complex Gel: a light fluid gel suitable for normal, combination or mature skins which prefer a lightweight application, use am under sun protection or pm alone. Can be diluted for a lighter application.

Active Glycolic Complex Cream: a rich cream for use at night, suitable for those who prefer a richer creamier application.

Active Glycolic Complex Solution: a liquid application suitable for oily acne skins and those who prefer an oil free application acts as a natural anti-bacterial to reduce breakouts. Use am or pm as directed.

3rd Step: Nourish And Protect

Interactive Daily Facial Support: a rich non-pore clogging moisturiser designed for use during the skin peeling process or laser rejuvenation. It hydrates and moisturises the epidermis leaving your skin moist all day. May be used up to three times daily for more dry skin conditions. Apply a.m. or p.m.

Daily Drench: is a light fluid high anti-oxidant moisturiser suitable for oily, acne or all skin types. Drench may be applied as a serum under interactive moisturiser. Apply a.m. or p.m.

24 Hour Eye Cream: light weight effective eye cream designed to be applied to the eyelids and under eye area. Addresses all the signs of aging, dryness fine lines, dark circles, and tightens eye bags. The added benefits are as an eyelash conditioner and brow conditioner. Apply a.m. & p.m.

Capillary Therapy Cream: light non clogging formula designed to reduce redness and high colour. Rich in anti-oxidants, vitamin K, A and E. May also be used on any skin type as a light moisturiser to help improve bruising or poor healing conditions apply a.m. or p.m. or both as directed.

Solar Eclipse SPF 30: a phenomenal sun and environmental protector designed as a lightweight non-greasy, non-pore clogging formula. Great for use under make-up. Safe for use on upper and lower eyelids, which need protection from environmental damage. Must be applied daily all year round especially after microdermabrasion, peels, laser, IPL or electrolysis.

Weekly Home Care

Instant Radiance Mask: a must have three in one mask for all non-sensitive skin types. Wash skin thoroughly with Glycolic cleanser, apply mask in upward outward movements to the face and neck or hands. After 10 mins rinse and wash with glycolic cleanser again to reveal clean, firm, lifted beautiful skin. For breakouts apply to specific spot areas for over night healing. Congested skin can benefit from 3 applications per week.

Kojic Acid Mask: designed originally for hyper pigmented conditions we added extra b vitamins and nutrients. This mask can be used to regenerate and revitalise your skin, while it lightens pigmentation changes. Wash skin; apply to face and neck and back of hands. Rinse after 10 mins and apply moisturiser.

Calm, Soothe & Recovery Mask: this blue soothing nutrient mask is high in calming azulene and minerals. Use for calming all skin conditions and re-hydration. Apply to skin 2-3 times weekly as above.

Active Glycolic Peels

Begin your new skin regime by using glycolic Cleanser am & pm and prescribed active glycolic complex, for your skin type, for one week prior to treatment. During this time your skin will begin to change –it may get a little dry, experience some redness or become flaky or experience some breakouts –this is normal and is a sign of good things to come. Your salon peels will begin with a 15 min treatment, one week later your treatment time will extend to 30-45 mins depending on whether you need a de-clogging treatment. You may have a course of peels which is usually 6, 1-2 weeks apart. Some individuals may need more treatments. Followed by maintenance of one treatment every 4-6weeks

Microdermabrasion

Our unique system of skin resurfacing is carried out by your therapist in a comfortable, effective hands on treatment. Multi-edged crystals immersed in an amazing emulsion of tonifying and skin tightening oils will re-texture, refine and renew your skin. Microdermabrasion should be carefully selected for your skin condition by your therapist who will advise you of the best of the Doctors Collection for your skin.

Redness/Rosacea Programme

Rosacea is extremely common in this part of the world and is exacerbated by lifestyle. Your Therapist will recommend a course of potent Vitamin K treatments to address the high colour associated with the condition. Advice on diet, herbs, and nutrients is important. Treatment helps to reduce inflammation, cool heat in the skin and increase healing. Because the lymph system is often congested in red sensitive skin your treatment also includes manual lymph drainage.
